Sir:

APPLICANT'S SUMMARY OF INTERVIEW PURSUANT TO MPEP § 713.04

Applicant's undersigned representative requested an Examiner Interview to clarify rejections made in the Office Action dated February 15, 2008. In the Office Action, the Examiner stated that the previously submitted Declaration of Mr. Schweikert under § 1.132 was insufficient to overcome the rejection of claims 22-25, 27-30 and 33-35 under 35 U.S.C. § 102 based upon the Ash reference.

During the Examiner Interview, occurring May 21, 2008, the Examiner initially requested a submission of statements by the other named inventors of the present application that they worked under the direction of Mr. Schweikert. Applicant's undersigned representative noted that, in his belief, such disclaiming declarations were not required. The Examiner agreed.

Applicant's undersigned representative also briefly discussed the contribution of all three inventors named in the present application, noting that Dr. Schon's contribution was primarily directed to the general structure and configuration of the disclosed catheter assembly, while Mr. Schweikert's and Mr. Madison's contributions were primarily directed to engineering aspects of the catheter, to the methods of manufacture, and to other structural features of the disclosed catheter assembly. Nonetheless, Applicant's undersigned representative noted that all three inventors collaborated collectively over much of the inventive process.

Respectfully submitted,

Shawn S. Li
